
Project Name: Alberta Law Courts (Retrofit System)

Location: Edmonton, AB

Owner: Alberta Public Works

Prime Consultant: Stantec

Facility: Provincial law courts building located in Edmonton, Alberta.

DelcoSecurity Scope: Engineered, manufactured, and commissioned a three node information and security system for the entire building. The system was programmed with courtroom status on one CATV system and courtroom status and alarming on another CATV system. The CATV broadcast multiplexer distributes the courtroom status graphics displays to multiple monitor locations throughout the facility. The system also included a PLC passive duress system.
